

Fara Vicentino 2nd March 2016

Header: MB presents GENERATION 3.0

MB Crusher is ready to globally launch the **third generation** of **Crusher Buckets** that have shaped the **history of crushing**. **Upgraded and renovated**, the newest BF units still represent, after over a decades on the market, the **most popular and awarded model**. For the first time ever the new generation will be on display and **working at Bauma 2016 DEMO AREA**, the renowned construction and earthmoving fair.

Designed for all excavators the new Crusher Bucket are now even **more compact with better balance in the collection phase**. The crusher's mouth was **further expanded** thus increasing the crushing surface and consequently the **productivity**. With the **dust suppression** system, the **iron separator** and low **noise impact**, it can be easily used in any construction site, even in residential areas and within total compliance with environmental regulations.

MB buckets are the **only ones in the world that does not need drainage**, and also the ones that ensure **higher productivity** compared to the countless imitations of the original BF unit. **MB's crushing power** in fact **exceeds 110m³ / hour**, thanks to the exclusive **power enhancer**, which allows to crush the **hardest and tenacious materials** as basalt and granite, ensuring a **finished product with the lowest price of the market** and in compliance with the **high quality standards required** for waste material reuse.

MB buckets are proven the **most effective eco-friendly tools** in: demolitions, recycling, excavations, road works, quarries, mines and environmental remediation made for **crushing, screening, divide and reuse inert material directly on site**.

MB Crusher is the only manufacturer in the world able to offer a complete range of **18 buckets: crushers and screeners** for excavators, loaders, skid steer loaders and backhoes from 2.8 to 70+ tons with a **24 months warranty**

MB is at BAUMA 2016 at the stands:

- INFO POINT Hall C4 -146
- PROMOTIONAL POINT A6-B6
- DEMO AREA F8 – N832/3
