

TITLE: MB presents the new MB-LS220, the screening bucket for larger loaders and backhoes.

Who came to the last edition of Bauma, has seen the world premiere of the latest MB model, **the new screening bucket MB-LS220**. The **MB-LS220** is not simply a screening bucket, but **the screening concept evolution**: designed specifically for owners of loaders and backhoe loaders from 12 to 35 tons, which have great need to select waste material but until now, there wasn't a solution available in the market.

What are the user advantages?

First of all a **great flexibility**, in fact, the new **MB-LS220** allows the optimization of loaders and backhoe loaders, transforming them in a few minutes into an **efficient mobile screening plant**, able to process debris in all the process phases. As it does not need to operate over the heap of material, as otherwise required by other excavators screeners, the new **MB-LS220**, facilitates and speed the processing of the material on different sides of the same construction site.

What are the applications?

There are many applications for the new screening bucket: used in **any type of process for separation of waste** or natural materials. The new **MB-LS220** can sift material of various sizes, used for example in drainage jobs to obtain an end product to use it in the coverage of underground pipelines for protection.

How did the idea of the new MB-LS220?

As per tradition, **MB** always tries to offer to customers **innovative solutions** that allow to work in the best conditions, optimizing the customer's fleet with this new screening bucket. Constant research and **attention to customer needs**, put MB into position to offer the most powerful and comprehensive range ever.

What are the range details?

MB-LS series has 3 models:

- 1) **MB-LS 140**, the smallest in the series, suitable for skid steer loaders and backhoe loaders from 2.6 ton;
- 2) **MB-LS 170**, launched at the beginning of 2016, suitable for skid steer loaders and backhoe loaders from 6.5 to 11 ton;
- 3) **MB-LS 220**, the latest gem, suitable for backhoe loaders and skid steer loaders from 12 to 35 ton;

All **MB** screening buckets are equipped with **interchangeable modular panels** to allow a rapid change of grid size. The unique and innovative conic basket shape is designed to **significantly increase the hourly production** performance and to sift all the material scooped, with no residue.
