

ACE CENTRO ENTERPRISES

Innovating the future

Ace Centro Enterprises (ACE) is a European professional organization offering a broad spectrum of innovative engineering products to the Petrochemical, Mining, Marine and Civil Construction sectors. Through its sales offices, service workshops and logistic facilities spread across the U.A.E.; ACE is geared to provide professional service to its clients spread across the MEA - Middle East and African region. Over the years, we continue to enjoy clients placing repeat orders due to our stocking program, professional service, and competitive pricing strategy.

This Big 5 2016 the Management of ACE endeavors to make bigger contributions to the Middle Eastern clientele, by launching two new American product lines into the market.

- Industrial Vacuum Systems from Vector.
- ToughTek Mortar Pumps from Graco.

Our partner M/s. Vector Technologies Ltd. from Wisconsin, U.S.A., is a renowned designer and leading manufacturer of powerful mobile and in-plant Industrial Vacuum systems. Vector has supplied more than 5000 units for problem-solving in production, clean up and conveyance process for steel mills, carbide plants, cement plants, asbestos and hazardous waste removal applications. Engineers at Vector have developed computer-based programs for system performance evaluation, while the team focuses on the continuous development and product up gradation with latest technologies to enhance material handling capacity and conveyance productivity.

Advantages of Vector Industrial Vacuum Systems:-

- ✚ New efficient closed loop design obsoletes all prior industrial technology.
- ✚ Easy to set up, operate, maintain and safe to use.
- ✚ Performance proven in desert and adverse conditions.
- ✚ Vacuum range: 15" to 28" Hg.
- ✚ Conveying distances: 180 to 360 meters.
- ✚ Designed to load into roll-offs, dump trucks, boxes and jumbo bags.
- ✚ Completely self-contained for bulk loading without additional equipment.
- ✚ Powerful industrial vacuums with vacuum truck power for a fraction of the cost.
- ✚ Built to last; many Vacuum Systems made by Vector are still operating after 20 years in the field.

Graco Inc. from Minneapolis, U.S.A. needs no introduction. The conglomerate founded in 1926, is listed on the NYSE and known worldwide as the premier manufacturer of fluid handling systems.

Graco equipment can move, measure, control, dispense and spray a wide range of fluids and viscous materials like paints, PFP materials and mortar that is used in manufacturing, processing, construction and maintenance industries. The R&D Team at Graco is constantly working to develop new technological solutions to enhance the performance of its products and optimize sustainable operations.

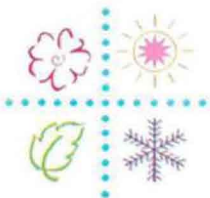

Advantages of ToughTek Mortar Pumps:-

- ✦ Engineered piston pump technology to deliver high pressures and move materials through long hose lengths.
- ✦ Quick knock down design makes it easy to operate and maintain on the job site.
- ✦ Long-lasting wear parts resulting in lesser downtime and lower maintenance costs.
- ✦ Interchangeable from Stucco to Fireproofing mode and vice versa by simply swapping the pump lower kit.
- ✦ Increased productivity and solid handling capacity.
- ✦ Compact and small footprint design allows easy usage in tight spaces.
- ✦ Durable piston pump withstands highly abrasive materials.
- ✦ Variable speed control enables control of flow and pressure.

With its Central Logistics Facility strategically positioned in Jebel Ali, ACE can provide products, spare parts and technical assistance in the form of project consultancy and service, across the region.

Ace Centro Enterprises has supplied engineering equipment comprising of Grout Plants and Heavy Duty Submersible Pumps to prestigious projects like Jebel Ali Power Station - Dubai Electricity and Water Authority (DEWA), Doha Metro Redline South in Qatar, Kuwait Oil Company, Riyadh Metro Project and Ma'aden Phosphate Company in Saudi Arabia, amongst many others.
