

Altrex

Quality on the highest level. Safety all the way to the top step. You'll find it at Altrex. For more than 65 years, we are ahead if it comes to access solutions. Always looking for innovation. For us, it is not about innovation but to make your work easier and safer through innovation. That is after all what it's all about. The certainty that you work with the best. Not only today but also tomorrow.

Safe-Quick Technology

With the new Safe-Quick® GuardRail Rolling Towers, Altrex has developed a new safer assembly method. These scaffolds are even safer, faster and easier to assemble and they can also be used façade free. All-round protection is already in place before the platform is mounted, including during assembly. Numerous braces have been replaced by the Safe-Quick® GuardRail, so fewer parts are required. The unique design means that the Safe-Quick® GuardRail can easily be assembled or disassembled by just one person. QR codes have been applied to the scaffold frame and on the Safe-Quick® GuardRail, allowing easy consultation of the Assembly and User Manual.

Most innovative welding line in Europe

Altrex builds for the future. Which is why we have opted for tomorrow's technology. It has now also become a part of our production line. We are making an innovative and technical leap with an entirely new welding line. New technologies and innovations enable us to make our products increasingly smarter in order to work still more safely and to address every question. Precisely where this is specific and other than standard. Our new welding line has all of it in-house.

Become a dealer of quality and safety. Join the global Altrex network.

A large and valuable network. International and full of knowledge and expertise. Become an Altrex dealer and be a part of the innovations and the most intelligent solutions for working at a height. Over 5000 partners in 60 countries have already decided to become an Altrex dealer. Together we ensure our wide range of products are available to people all over the world. The network continues to grow and more and more dealers are now enjoying the advantages partnership has to offer.
